

# MONKEYRACK®

## LADDER STABILIZATION SYSTEM

### SUPERIOR STABILIZATION . . . FROM THE GROUND UP

Extension ladder safety is no accident; it is the by-product of superior safety products that provide viable solutions to common workplace challenges.

Specifically designed to address critical fall protection needs, the patented Monkeyrack® Ladder Stabilization System uniquely bonds a receiver hitch and an extension ladder together, to provide superior ladder safety, stability, and vital fall protection.

### *Discover the MONKEYRACK® Difference*

Monkeyrack® Ladder Stabilizer/Hitch Attachment – Part #Y8047331

- Patented Design
- GSA Contract GS30F006BA/Federal Supply Schedule 23V
- Small Business/Woman Owned/Disaster Recovery
